IN 2026**

Shaping Demand, Markets and Opportunities A Priority on Buying Canadian

Following the success of the CTIA Conference and Expo – One Voice Together, CTIA Outlook 2026 is set to be a key event connecting industry capabilities with the evolving needs of the public and private sectors. Organized in collaboration with TechniTextile Québec, the event will bring together public buyers, end users, innovators, and Canadian manufacturers for a strategic exchange on procurement and innovation, with a strong emphasis on purchasing Canadian-made products.

The market-focused program will highlight the priorities of Canada's national defence, as well as the needs of municipal and infrastructure sector buyers and the emerging requirements of public services (police, firefighters, power generation). It will also address applications in PPE, technical textiles, specialized apparel, and footwear.

« The event will bring together public buyers, end users, innovators, and Canadian manufacturers »

A dedicated innovation session will bring together experts and practitioners to present new technologies, materials, and solutions that respond to regulatory requirements and evolving market expectations. This event will provide a unique platform to better understand procurement trends, anticipate demand, and create practical opportunities for collaboration across Canada.

Designed for federal, provincial, and municipal government representatives, public sector end users, and Canadian manufacturers, CTIA Outlook 2026 will offer exclusive access for CTIA members, with complimentary participation for public sector representatives and qualified end users.

The detailed agenda, speakers, and registration information will be announced soon.
